The MAILING DATE of this communication app Period for Reply	pears on the cover sheet with the	correspondence addr	ess
A SHORTENED STATUTORY PERIOD FOR REPL THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.1 after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a repl If NO period for reply is specified above, the maximum statutory period or  - Failure to reply within the set or extended period for reply will, by statute Any reply received by the Office later than three months after the mailing earned patent term adjustment. See 37 CFR 1.704(b).	36(a). In no event, however, may a reply be ting within the statutory minimum of thirty (30) day will apply and will expire SIX (6) MONTHS from the application to become ABANDONE.	mely filed  ys will be considered timely.  n the mailing date of this comi ED (35 U.S.C. § 133).	munication.
Status			
1) Responsive to communication(s) filed on 7/22	<u>′04</u> .		
2a) ☐ This action is <b>FINAL</b> . 2b) ☐ This	action is non-final.		
3) Since this application is in condition for allowa			nerits is
closed in accordance with the practice under E	Ex parte Quayle, 1935 C.D. 11, 4	53 O.G. 213.	
Disposition of Claims			
4) Claim(s) <u>1-33 and 35-50</u> is/are pending in the	application.		
4a) Of the above claim(s) 35-50 is/are withdraw	vn from consideration.		
5) Claim(s) is/are allowed.			
6)⊠ Claim(s) <u>1-33</u> is/are rejected.			
7) Claim(s) is/are objected to.	and and an experience of		
8) Claim(s) are subject to restriction and/o	r election requirement.		
Application Papers			
9) The specification is objected to by the Examine	er.		
10)☐ The drawing(s) filed on is/are: a)☐ acc	epted or b) objected to by the	Examiner.	
Applicant may not request that any objection to the	drawing(s) be held in abeyance. Se	e 37 CFR 1.85(a).	
Replacement drawing sheet(s) including the correct		•	` '
11)☐ The oath or declaration is objected to by the Ex	caminer. Note the attached Office	Action or form PTO	-152.
Priority under 35 U.S.C. § 119			
12)⊠ Acknowledgment is made of a claim for foreign	priority under 35 U.S.C. § 119(a	)-(d) or (f).

Application/Control Number: 10/030,570

Art Unit: 1762

1. Applicant's election of Group I, claims 1-33, in the reply filed on 7/22/04, is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 34 and 51 have been canceled. Non-elected claims 35-50 should be canceled in response to this office Action.

## Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claims directed to forming a field emission material remain. No claims directed to the field electron emitter remain.

## Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter that the applicant regards as his invention.

Claims 1-33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Application/Control Number: 10/030,570

Art Unit: 1762

With respect to claim 1, the claim is confusing. Silica precursor is applied to the graphite particles and then processed in step (b). Wouldn't the amorphous silica already be coated on the graphite particles? In addition, how does applying the graphite particle to an electrically conductive surface "lead to" partial amorphous silica coating? Is there a second mixture? Clarification is requested. Furthermore, the term "processing" is vague and indefinite. What encompasses "processing" and how is this performed?

With respect to claim 2, the term "particle-like" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "-like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

With respect to claims 5-7 and 10, the terms "said first mixture" and "said second mixture" lacks antecedent basis. In addition, the silica precursor is applied to the graphite particles and not the conductive surface. Furthermore, not sure if the first or second mixture is applied to the surface as well.

With respect to claims 11 and 21, the terms "said first mixture" and "said second mixture" lacks antecedent basis.

With respect to claim 20, the claim is redundant to claim 16. The Examiner suggests deleting one of the claims as they claims are identical in claim limitations.

With respect to claim 31, the term "decorated" is confusing. The Examiner suggests deletion of this term. The Examiner questions the difference between "coated" and "decorated" and whether the claim is further limited by such term.

With respect to claim 32, the term "prism planes" lacks antecedent basis.

Application/Control Number: 10/030,570

Art Unit: 1762

With respect to claims 3,4,8,9,12-19,22-30 and 33, the claims are objected to as being dependent upon a base rejected claim.

## Allowable Subject Matter

- 4. Claims 2-33 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
- 5. Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
- 6. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record fails to teach or fairly suggest applying silica to graphite particle and processing the silica precursor to form a coating of amorphous silica that is doped and/or heavily defective on the graphite particles. The prior art teaches coating graphite particles with coatings other than silica.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian K Talbot whose telephone number is (571) 272-1428. The examiner can normally be reached on Monday-Friday 6AM-3PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Shrive P Beck can be reached on (571) 272-1415. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
